

ParcelQuest to offer Recorded Documents through its online service

FOLSOM, CA, April 11th, 2013 – In an ongoing effort to expand its data set, ParcelQuest announced today the availability of Recorded Documents through ParcelQuest.com. With a ParcelQuest subscription, customers can now order recorded documents directly from their online account for \$5.00 per document.

“Ordering a recorded document through ParcelQuest will provide our customers with a unique benefit,” says Grant Mulligan, president and owner of ParcelQuest. “They can order documents instantly with just a single click on a property profile. This provides a streamlined approach to accessing a broader set of data associated with a specific parcel.”

ParcelQuest expects recorded documents to appeal primarily to customers requiring complete legal ownership information as well as full property legal descriptions.

About ParcelQuest

Since 1995, ParcelQuest has been working directly with all 58 California county assessors and their staff to provide the most current data and parcel maps available anywhere. ParcelQuest also provides GIS files and data sets that are continually standardized and updated to reflect the latest parcel boundaries and assessor information, including ownership, assessments, sales and property characteristics. ParcelQuest currently markets its products and services through the website: www.parcelquest.com.
